

1) Parenting : Many Children

If in the chart the planets ☽, ♀ and ♃ are with ♀ connected, then the horoscope owner will have many children.

These midpoint pictures can be already seen in harmonic 1,4,8 or 16. it could be also first noticeable in harmonic 64 or 256. If with these midpoint pictures Venus involved, then most children are girls.

In two examples that we have, the mother died result of childbirth. The mothers who died at the last birth, had the equation shown below.

$$\text{☽} / \text{♀} = \text{♃} / \text{♀} = \text{♂} / \text{♄}$$

2) Parenting : Childless

If in the chart the planets ☽, ♀ and ♃ are with ♄ connected, then the horoscope owner remains childless.

Used :

1-Sidereal zodiac (Krishnamurti Ayanamsa),

2- Harmonic up to 256

Planets positions in the houses, house rulers, nakshatra and sub lords were not taken into consideration. This work should be thought-provoking for further research.

Even though she had saturn connections in harmonic 4 ,she had seven children. Because there are in harmonic 16 exact Pluto connections, what we can not see in harmonic 4.

Harmonic 4

Sidereal (23°45'56", 50.2388475")
Ayanamsa 19°36' 1"
Ecliptic
Geocentric
Placidus
H4 90°

Harmonic 16

$$\text{☾} / \text{♀} = \text{♂} / \text{♀}$$

$$\text{♂} / \text{♀} = 20^\circ 20' 17'' - (11^\circ 15' 00'' + 5^\circ 37' 30'') = 03^\circ 27' 56''$$

$$\text{☾} / \text{♀} = 03^\circ 26' 06''$$

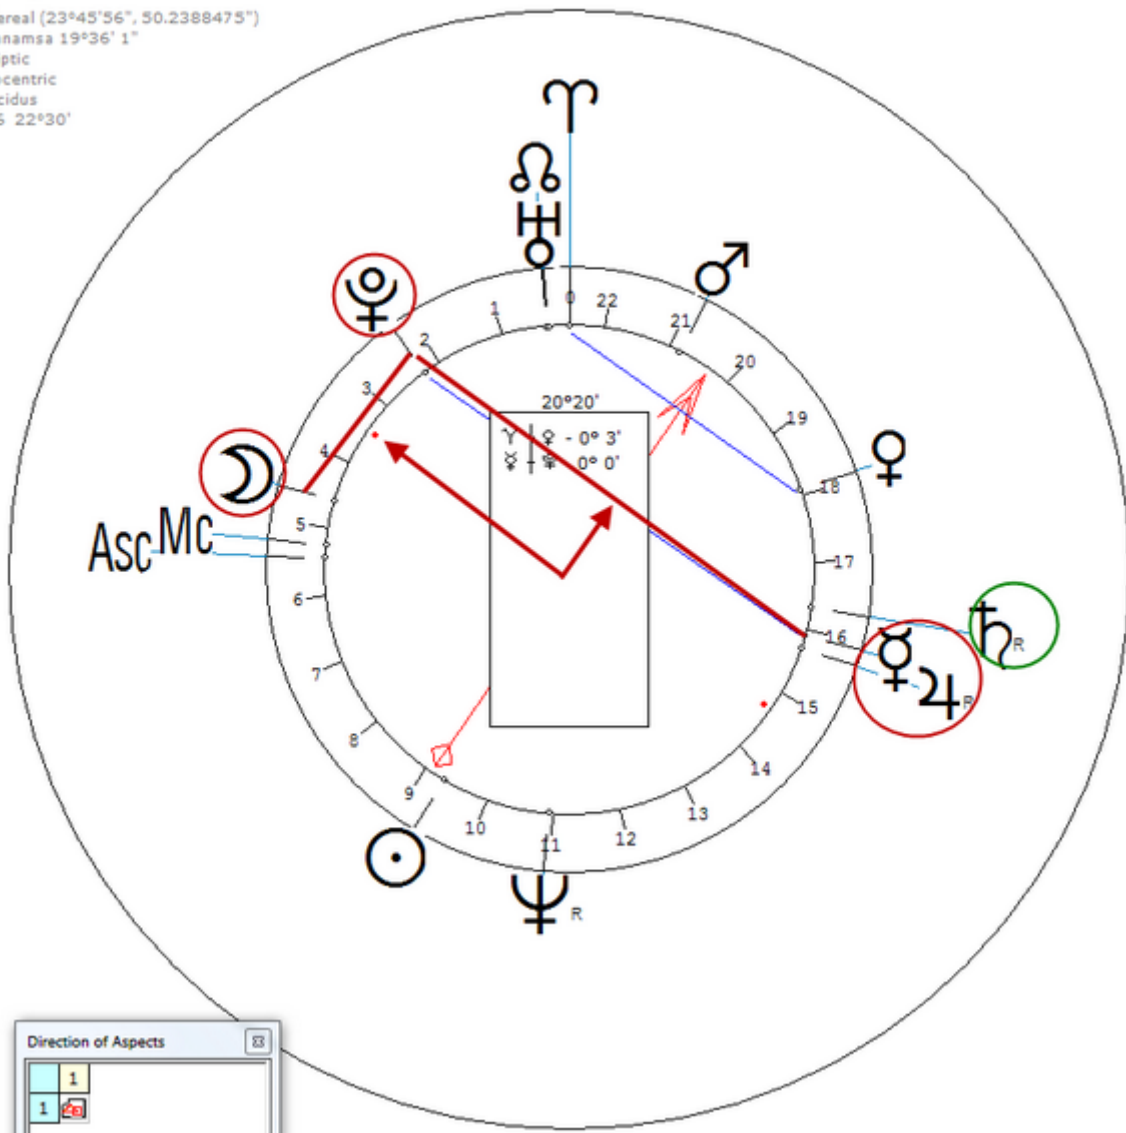

It also shows that the precise harmonics are much more important than not-exact harmonics and so-called "Aspects" (Sextile, Trine, Quincunx, ... etc.) , which are anyway rounded harmonics.

The higher the harmonics, the more effective they are.

Maria Amalia, Holy Roman Empress

22 October 1701 Sat 14:30 (GMT+1:05:20) 48n13 16e20
